

Biology: concepts and investigations

1. Inferior plants.
2. Higher plants.
3. Characteristics of typical plant and animal cell structure. Characteristics of plant tissue structure.
4. Characteristics of gymnosperm plants.
5. Characteristics of angiosperm plants.
6. Medical and rare plants.
7. Characteristics of invertebrate and vertebrate.
8. Characteristics of the Class Pisces.
9. Characteristics of the Classes Amphibia and Reptilia.
10. Characteristics of the Class Aves.
11. Characteristics of the Class Mammalia.
12. Characteristics of Ecosystem ecology.
